

Executive Council
*of the European Federation of
Psychologists' Associations
Brussels, Belgium*

Dear colleagues,

As a member association, **National Psychological Association** shares the values of EFPA and aspires to provide implementation of best psychological practices in Ukraine.

With that in mind, during the **National Round Table** on March 23, 2018, it was decided to ask EFPA about holding of **European Semester (ES) of Psychology 2019 in Ukraine**. We would like to ask you to consider NPA's application for this and provide us instructions on how Ukraine could get it if such an opportunity is available.

Some of Ukrainian psychological organizations including **VN Karazin Kharkiv National University** and **Institute for Social and Political Psychology of National Academy of Educational Sciences**, voiced their willingness to support this process by the conclusion of memorandums about ES 2019 with NPA.

It would be an important step for European's integration of the Ukrainian professional psychological community and we will greatly appreciate such an opportunity!

Sincerely,

Prof. Leonid Burlachuk

President of the National Psychological Association of Ukraine
